Summary

UX/UI-focused Computer Science student with experience in AI-driven products, human-centered design, and product development. Skilled in wireframing, prototyping, and translating user needs into scalable digital solutions. Experience working on AI-powered platforms, user research, and cross-functional product environments. Strong focus on innovative problem solving, user experience optimization, and delivering high-quality technical solutions.

Skills

- **Programming:** Java, Python, JavaScript, HTML, SQL, Tableau, Github, Excel
- **Design Tools:** Figma, Wireframing & High-Fidelity Prototyping, Design Critique & Heuristic Evaluation, draw.io
- **Soft Skills:** Innovative Problem Solving, Team Player, Product Thinking, UX Research

Work Experience

-  **Rally Technologies** | Charlotte, NC | Intern 09/2025 - 04/2026
- Supported development of Rally Track, an AI-powered pickleball platform with real-time scoring, automated line calling, and gamified gameplay.
 - Assisted with product requirements, user feedback analysis, testing, and cross-functional collaboration across product, engineering, and design teams.

-  **Linxy** | Charlotte, NC | Intern 09/2025 - 12/2025
- Applied human-centered design principles to develop student engagement experiences for a campus-focused platform
 - Designed and prototyped QR-based interaction flows and event concepts to increase student participation
 - Conducted stakeholder outreach and coordination with university organizations
 - Translated user needs into actionable product and experience requirements
- Evaluated feasibility, usability, and scalability when planning features and live activations

-  **Bank Of America** | Charlotte, USA | Intern 11/2021 - 12/2021
- Built solutions to community finance challenges, exposure to data analysis, design, and technology skills.
 - Designed a prototype banking app to help users control and manage all of their finances within one app.
